Astronomy - Official Site

Astrology is a pseudo-science which claims that the positions of the heavenly bodies have an effect on the lives of human beings and events on Earth. A long time ago, astronomy and astrology were the same.

What's the difference between astronomy and astrology

Astrology and astronomy. Astronomy, the study of objects and phenomena originating beyond the Earth's atmosphere, is a science and is a widely studied academic discipline. Astrology, which uses the apparent positions of celestial objects as the basis for the prediction of future events, is a form of divination and a pseudoscience having no scientific validity.

Astrology and astronomy - Wikipedia
