Mycology is the branch of biology concerned with the study of fungi, including their genetic and biochemical properties, their taxonomy and their use to humans as a source for tinder, medicine, food, and entheogens, as well as their dangers, such as toxicity or infection.. A biologist specializing in mycology is called a mycologist.. Mycology branches into the field of phytopathology, the ...

Mycology - Wikipedia

Developmental biology is the study of the process by which animals and plants grow and develop. Developmental biology also encompasses the biology of regeneration, asexual reproduction, metamorphosis, and the growth and differentiation of stem cells in the adult organism.. In the late 20th century, the discipline largely transformed into evolutionary developmental biology

Developmental biology - Wikipedia

Marine Biology Concentration. The marine biology concentration provides students with coursework, specialized advising, and practical experience in marine biology while ensuring a strong, balanced education in one of the traditional natural sciences in which students major.

Biological Sciences < Old Dominion University

Animals that are the least specialized generally stand the best chance of survival when the environment suddenly and drastically changes because they are able to " A adapt to different conditions B mutate rapidly C move from place to place D reproduce abundantly Ascidians are sac-like marine
