A foundation is the element of a structure which connects it to the ground, and transfers loads from the structure to the ground. Foundations are generally considered either shallow or deep. Foundation engineering is the application of soil mechanics and rock mechanics (Geotechnical engineering) in the design of foundation elements of structures.

Garage Foundation Do YOU Need?" The garage foundation is the most important part of your building project from a long-term perspective. It determines the stability of what you place on top of it and has to be designed in accordance with the weather and soil conditions that exist on the property where you plan on building a garage.
