Vector Calculus - mecmath

This is a very important topic in Calculus III since a good portion of Calculus III is done in three (or higher) dimensional space. We will be looking at the equations of graphs in 3D space as well as vector valued functions and - how we do calculus with them. We will also be taking a look at a couple of new coordinate systems for 3-D space.

Most calculus books are chosen for their mathematical rigor (like using precise definitions). While this is great for math majors (or at least mathematicians think so), the rest of the students are usually left clueless. This text gives rigorous definitions, but then after each definition, there is a "what this says" section usually accompanied ...
