central processing of visual pdf

Visual perception is the ability to interpret the surrounding environment using light in the visible spectrum reflected by the objects in the environment. This is different from visual acuity which refers to how clearly a person sees (for example "20/20 vision"). A person can have problem with visual perceptual processing even if he/she has 20/20 vision.

Visual perception - Wikipedia

Auditory processing disorder (APD), also known as central auditory processing disorder (CAPD), and rarely known as King-Kopetzky syndrome or auditory disability with normal hearing (ADN) is an umbrella term for a variety of disorders that affect the way the brain processes auditory information. Individuals with APD usually have normal structure and function of the outer, middle, and inner ear ...
