2022-2062. The next generation of London Tube trains. A new generation of London Underground trains enters service during 2022, * remaining in operation for 40 years. * The aging Tube network had been underinvested for decades – resulting in ever-worsening delays, overcrowding and safety issues. In the early 21st century, however, a massive programme of upgrades and modernisation was initiated.

The Orion MPCV takes basic design elements from the Apollo Command Module that took astronauts to the moon, but its technology and capability are more advanced. It is designed to support long-duration deep space missions, with up to 21 days active crew time plus 6 months quiescent. During the quiescent period crew life support would be provided by another module such as a Deep Space Habitat.

A radio clock or radio-controlled clock (RCC) is a clock that is automatically synchronized by a time code transmitted by a radio transmitter connected to a time standard such as an atomic clock. Such a clock may be synchronized to the time sent by a single transmitter, such as many national or regional time transmitters, or may use multiple transmitters, like the Global Positioning System.
