Closing the gender gap for development

1 -1 0 THE STATE 1 OF FOOD 20 AND AGRICULTURE

PART 3 Feed demand for cereals is often considered a dynamic element that conditions the growth of the cereals sector, especially in developed countries. However, in recent times, particularly in developing regions, this dy-

Trends in the livestock sector - Food and Agriculture

Highlights We define the concepts relevant for yield gap analysis. We review different methods for local and global yield gap analyses. Global methods are coarse and local studies use different methods. A number of methods is compared using data sets from three regions. Components of a protocol for global yield gap analysis with local relevance are proposed.

Yield gap analysis with local to global relevance – A review

The distinguishing feature of the rodents is their pairs of continuously growing, razor-sharp, open-rooted incisors. These incisors have thick layers of enamel on the front and little enamel on the back. Because they do not stop growing, the animal must continue to wear them down so that they do not reach and pierce the skull.

The economic history of Argentina is one of the most studied, owing to the "Argentine paradox", its unique condition as a country that had achieved advanced development in the early 20th century but experienced a reversal, which inspired an enormous wealth of literature and diverse analysis on the causes of this decline. Since independence from Spain in 1816, the country has defaulted on its ...

The genetic modification of animals to obtain transgenic animals started in 1980. The first transgenic animals were mice, which are still the most frequently used transgenic species. About 20 transgenic species have been obtained and they are more or less currently used. Various methods are being implemented to transfer foreign genes to the different species.

Impacts of genetically modified animals on the ecosystem

Soil is a “treasure beneath our feet,” essential to human lives and well-being, a senior United Nations official has highlighted, warning, however, that this invaluable resource is under constant threat from the little-understood phenomenon of soil pollution.

UN News | Global perspective, human stories

In the coming few decades, global freshwater demand will increase to meet the growing demand for food, fibre and biofuel crops. Raising water productivity in agriculture, that is reducing the water footprint (WF) per unit of production, will contribute to reducing the pressure on the limited global freshwater resources.

Water footprint benchmarks for crop production: A first

The next time you shop, swap one of everything to something just one brand level lower. So if you usually buy four cartons of Tesco's own-brand orange juice, this time buy three of those and one Tesco Everyday Value.
