A frog is any member of a diverse and largely carnivorous group of short-bodied, tailless amphibians composing the order Anura (Ancient Greek ἀ- (á), without + ἴχθυον (íχthyon, tail). The oldest fossil "proto-frog" appeared in the early Triassic of Madagascar, but molecular clock dating suggests their origins may extend further back to the Permian, 265 million years ago.

In all bilaterian animals, the mesoderm is one of the three primary germ layers in the very early embryo. The other two layers are the ectoderm (outside layer) and endoderm (inside layer), with the mesoderm as the middle layer between them. The mesoderm forms mesenchyme, mesothelium, non-epithelial blood cells and coelomocytes. Mesothelium lines coeloms. ...

Some glutamate residues at the C-terminus are polyglutamylated. This modification occurs exclusively on glutamate residues and results in polyglutamate chains on the gamma-carboxyl group.

Much of our knowledge regarding vertebrate blood and blood cells is based on mammalian references. The critical study of nonmammalian vertebrate blood is relatively new, and comparatively few investigations have been published that focus on these animals' ontogeny and structure-function relationships of blood cells.

A Genome Browser is now available for the Proboscis Monkey (*Nasalis larvatus*) assembly released in November 2014 by the Proboscis Monkey Functional Genome Consortium. For more information and statistics about this assembly, see the NCBI assembly record for Charlie1.0. There are 553,412 contigs and 319,549 scaffolds in this assembly with a total size of 3,011,966,170 bases.

Browse the Genome Browser mailing list. Questions and feedback are welcome. What does the Genome Browser do? As vertebrate genome sequences near completion and research re-focuses on their analysis, the issue of effective sequence display becomes critical: it is not helpful to have 3 billion letters of genomic DNA shown as plain text!

Les anoures n'ont pas de queue, excepté sous leur forme larvaire, et la plupart ont de longues pattes arrière, des os des chevilles allongés, des orteils palmés et munis de griffes, de grands yeux et une peau lisse ou verruqueuse.

07 October 2014 - Introducing the UCSC Genome Browser Blog. We're excited to introduce a new blog that will feature posts by Genome Browser staff and guests. On the blog we'll be publishing in-depth information about UCSC Genome Browser features, tools, projects and related topics that we hope people will find both useful and interesting.

Deep learning algorithms, in particular convolutional networks, have rapidly become a methodology of choice for analyzing medical images. This paper reviews the major deep learning concepts pertinent to medical image analysis and summarizes over 300 contributions to the field, most of which appeared in the last year.

### A survey on deep learning in medical image analysis

Dichloroacetic acid is a derivative of ACETIC ACID that contains two CHLORINE atoms attached to its methyl group.
