Computational science and engineering (CSE) is a relatively new discipline that deals with the development and application of computational models and simulations, often coupled with high-performance computing, to solve complex physical problems arising in engineering analysis and design (computational engineering) as well as natural phenomena (computational science).

Bring Science Alive! is a program built from the ground up to align to the Next Generation Science Standards (NGSS) and the Common Core Standards. Bring Science Alive! embodies the new vision for how science should be taught in schools—“focusing on big picture concepts and teaching students how to do science” rather than memorize facts.

In order to reduce the cost of hole transporting materials (HTMs) for perovskite solar cells, the amide bond is introduced in the backbone resulting in a straightforward synthesis. Despite the lack of conjugation, the here presented HTM (EDOT-Amide-TPA) outperforms state-of-the-art materials in performance, showing over 20% power conversion efficiency, and stability, which is ...
