Each topic included in the test is mapped to a video or exercise that

Praxis® Core Mathematics - Educational Testing Service

An algebraic fraction is the indicated quotient of two algebraic expressions. As with fractions of integers, the denominator of an algebraic fraction cannot be zero. Two examples of algebraic fractions are $\frac{a}{b}$ and $\frac{a}{c}$. Algebraic fractions are subject to the same field properties as arithmetic fractions. If the numerator and the denominator are polynomials, as in $\frac{a}{b}$, the algebraic ...

Decimalisation is the conversion of a measurement system to units related by powers of 10, replacing traditional units that are related in other ways, such as those formed by successive doubling or halving, or by more arbitrary conversion factors. Units of physical measurement, such as length and mass, were decimalised with the introduction of the metric system, which has been adopted by almost ...
