Administrators typically configure installers before deployment via preferences and properties so that all machines across their organization have the requisite settings. The Acrobat family of products are built on a uniform platform, share a common set of preferences, and are similar in their ...

Preference Basics – Enterprise Administration Guide

This book covers the latest version of Red Hat Enterprise Linux (version 7) released in 2014. It addresses four major learning objectives: 1) a self-study exam preparation guide, 2) an in-class training manual, 3) an on-the-job reference, and 4) an easy-to-understand guide for novice and non-Linux administrators.

The default is for RFC 3041 support to be disabled. Stateless Autoconfiguration will derive addresses based on the MAC address, when available, using the modified EUI-64 method. The address is appended to a prefix but as the address is normally derived from the MAC address it is globally unique even when the prefix changes.

Red Hat Enterprise Linux 6 11.2. Interface Configuration

The Internet edge is the network infrastructure that provides connectivity to the Internet and that acts as the gateway for the enterprise to the rest of the cyberspace.

Enterprise Internet Edge Design Guide - Cisco

In previous releases of Red Hat Enterprise Linux, there were separate options for an installable tree accessible by NFS (the `nfs` option) and an ISO image located on an NFS source (the `nfsiso` option). In Red Hat Enterprise Linux 7, the installation program can automatically detect whether the source is an installable tree or a directory containing an ISO image, and the `nfsiso` option is deprecated.

Tableau Help | Tableau Software

In computer security, mandatory access control (MAC) refers to a type of access control by which the operating system constrains the ability of a subject or initiator to access or generally perform some sort of operation on an object or target. In practice, a subject is usually a process or thread; objects are constructs such as files, directories, TCP/UDP ports, shared memory segments, IO ...
