Internet Policy and Economics - Challenges and

This course will provide an introduction to the economics of the Internet and to economics as a tool for social research more generally. Economics is, at its heart, the study of why businesses, policy makers, and people make the choices they do—and of what can and should be done to influence these choices.

Internet Economics – Oxford Internet Institute

Policy & Internet calls for papers reporting on innovative research into some aspect of the implications of the Internet for public policy. Perspectives from any academic discipline are welcomed, particularly political science, economics, law, sociology, information science, communications, philosophy, computer science, psychology, management, geography and medicine.
